About me

I'm a self-taught Frontend Developer who specializes in JavaScript.

I have experience developing web applications with React and Node.js. I also have experience with Unit Testing, E2E Testing with Cypress, and writing documentation.

Currently, I'm learning TypeScript and UX fundamentals.

Work Experience

Full Stack Developer

Cleverttech | 05/2022 - 12/2022

I was part of the internal team that helped maintain a React and Node.js based application that manages nearly all of the company's operations, including the HR recruitment process, client projects, payments, developers, and leads.

Tasks:

- Create new features for the app on the front-end and back-end
- Fix bugs
- Daily meetings with the Team.
- Retrospective meetings to define action points
- Define solutions to customer requirements.
- Develop solutions using ReactJS, Node.js and MongoDB
- Design and development of unit tests on ReactJS.

Technologies used:

- React
- Node.js
- Redux Saga
- mongoose
- MongoDB
- ExpressJS
- Unit Testing
- Jest
- React Testing Library

React Developer

WIP-IT & Selection IT | 10/2021 - 03/2022

My primary responsibility was to develop visual elements of web applications by translating UI/UX design wireframes from Figma, into code while producing high-quality, reusable markup using HTML5, CSS, and JavaScript.

Tasks:

- Writing code in different programming languages.
- Work together with graphic designers to determine the layout of websites.
- Incorporation of new functions into the execution of websites and applications.
